Dear Hiring Manager,

I am interested in enterprise-platform delivery roles focused on roadmaps, prioritization, releases, adoption, service outcomes and cross-functional execution. I lead the evolution of national-scale enterprise platforms supporting approximately 60K users, 90K facilities/entities, 300 suppliers and around 1M transactions per month, translating institutional priorities into roadmaps, modernization initiatives, delivery priorities and operational ownership.

My experience spans the full platform lifecycle: stakeholder requirements, prioritization, architecture, engineering, data/integration, QA/UAT, releases, rollout, training, support and continuous improvement. Across Egypt and Oman, I have worked on complex government platforms where successful delivery depends not only on shipping functionality but also on adoption, service continuity and measurable operational value.

I would bring a structured, outcome-focused approach: clear ownership, strong stakeholder alignment, disciplined governance, practical technical judgment and attention to what is required for successful implementation and sustainable operation.

I would welcome the opportunity to discuss how this experience could support your organization's priorities and the outcomes expected from the role.

Sincerely,
Mahmoud Salama
