PROFESSIONAL PROFILE

Solution architect and software-engineering leader with 18+ years translating complex business and operational requirements into secure, scalable and supportable enterprise solutions across Egypt and Oman. Combines hands-on C#.NET engineering with solution and application architecture, API/integration design, data mapping, workflows/RBAC, CMS/DMS, security and non-functional requirements, architecture governance, technical documentation, design reviews, QA/UAT, release and production support. Currently governs solution architecture for national-scale procurement and medical-supply platforms serving ~60K users and ~1M transactions/month.

CORE LEADERSHIP AREAS

Solution Design & Requirements Analysis | Solution & Application Architecture | API & Integration Architecture | Data Mapping & API Contracts | Workflow / RBAC / DMS | Security & NFRs | Architecture Governance & Design Reviews | Stakeholder Alignment | Technical Trade-offs | Technical Documentation | Release & Service Transition

SELECTED CAREER IMPACT

- Govern solution architecture and design for a national procurement ecosystem serving ~60K users, ~90K facilities/entities and ~1M transactions/month.
- Bridge business requirements and engineering execution with hands-on C#.NET depth and architecture oversight across enterprise applications, APIs/integrations, workflows, data, reporting, security and production support.
- Led and contributed hands-on across 15+ enterprise/e-government platforms in Oman, including the National Educational Portal serving ~1M users.
- Led a 6-person development team and delivered substantial hands-on work across 150+ major and mid-sized digital solutions, portals and enterprise applications at Keyframe, excluding small engagements.

PROFESSIONAL EXPERIENCE

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt

05/2025 - Present

Head of the Central Administration for Information Systems & Digital Transformation

Scope: Solution Architecture | Enterprise Applications | API & Integration | Data | Security & NFRs

- Design and govern solutions for a unified national procurement platform spanning demand, approvals, tendering, supplier evaluation, contracting, purchase orders, delivery/receipt, documents, reporting, auditability and support across ~60K users.
- Translate stakeholder, business and operational requirements into solution boundaries, data models/mappings, API contracts, integration flows, workflow/rules, RBAC, document/archiving, audit, notifications, search, reporting and CMS capabilities.
- Apply modular, configurable and API-first patterns where appropriate; evaluate security, performance, scalability, resilience, monitoring/observability, supportability, deployment and continuity requirements before design approval.
- Lead architecture governance, solution/design reviews and technical decision-making across engineering, analysis, QA, data, infrastructure/security, support and third parties; document key design decisions from requirements through UAT, release, deployment and service transition.
- Resolve architecture trade-offs across reuse vs. customization, delivery speed vs. maintainability, technical debt, compatibility, integration complexity and operational impact while protecting critical-service continuity.

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt

10/2020 - 05/2025

General Manager - Systems, Applications & Technical Support

- Designed and modernized enterprise applications and configurable workflows across procurement, medical supply, inventory, reporting, CMS/publishing and stakeholder services.
- Strengthened solution quality through architecture governance, technical standards, solution/design and code reviews, integration discipline, technical documentation, QA/release gates and production-support feedback.
- Coordinated requirements, integration/data, compliance, rollout, training and operational readiness across multi-agency national initiatives.
- Used production incidents, support trends and user feedback to refine workflows, integration behavior, application design and service supportability.

Development Team Leader & Senior Full-Stack Developer

- Led a 10+ developer team while remaining hands-on across 15+ enterprise/e-government platforms, coordinating requirements, solution design, development, database/reporting, testing, deployment and production support.
- Contributed extensively to Maktabi/Morasalat Electronic Correspondence across workflow design, routing/forwarding/tracking, reports, database components, testing, defect investigation, deployment and application support.
- Delivered the Sultan Qaboos Award-winning Ministry of Education Recruitment System and contributed to International Schools, Crisis Management and Asset Management; also worked across Ministry of Agriculture portal delivery and integrations.
- Worked across full-cycle government-system delivery using C#.NET, ASP.NET, SQL Server/MySQL, JavaScript, REST/SOAP services, workflow/RBAC, reporting, integrations, testing, deployment and production-support practices.

Keyframe Egypt | Cairo, Egypt**04/2011 - 05/2016****Development Team Leader & Senior Full-Stack Developer**

- Led a 6-person development team while remaining deeply hands-on across 150+ major and mid-sized projects/engagements, excluding small projects, spanning government, healthcare, education, construction, automotive, events and commercial sectors.
- Delivered public-sector and enterprise solutions spanning Ministry of Health & Population work, MSAD, Rate Your Services, National Management Institute, Egypt Calendar, Elections in Egypt, education/HR systems and integrations.
- Delivered multiple award-winning digital solutions; Yashfeen is the confirmed ITIDA competition-winning healthcare portal.
- Built and customized CMS/electronic-publishing solutions using custom .NET CMS, Umbraco and Kentico with multilingual/RTL publishing, workflows, versioning, archiving, permissions, search, SEO, analytics and integrations.

Egyptian Armed Forces | Egypt**04/2008 - 10/2010****Linux Systems & Web Developer**

- Contributed to Egypt's first Linux distribution, working on Linux from Scratch builds, kernel modules, optimization and platform hardening; also built secure internal ASP.NET/SQL Server applications.

TECHNICAL & MANAGEMENT CAPABILITIES

Architecture & Design: Solution Architecture, Solution Design, Requirements Analysis, Application Architecture, N-Tier/Layered, Modular/Configurable Platforms, API-First, Shared Services, Architecture Governance, Architecture Trade-offs, Design Reviews, Technical Standards

Application & Integration: C#, .NET/ASP.NET Web Forms/Core/Web API, EF/ADO.NET/LINQ, JavaScript, REST/SOAP, JSON, API Contracts, Workflow/BPM, RBAC, CMS/DMS, Integration Flows

Data & NFRs: SQL Server, PostgreSQL, MySQL, Redis, Data Mapping, MDM/Reference Data, Data Quality, Security, Performance, Scalability, Resilience, Observability, Supportability, Continuity/DR

Delivery & Tooling: Stakeholder Alignment, Technical Documentation, QA/UAT, Release & Service Transition, Git/TFS, Jenkins, CI/CD, Postman, Swagger/OpenAPI, Visual Studio/VS Code, SSMS/DBeaver/DataGrip

EDUCATION & LANGUAGES

Education: B.Sc. in Computer Science, Faculty of Computers & Informatics, Zagazig University | 2003-2007

Languages: Arabic (Native) | English (Professional Working Proficiency)
