PROFESSIONAL SUMMARY

Technology program and delivery leader with 18+ years across Egypt and Oman and 200+ technology projects across the career, combining structured project management with business analysis, stakeholder engagement and technology transformation. Leads complex initiatives from discovery, requirements and planning through solution coordination, delivery, QA/UAT, change readiness, training, go-live, stabilization and operational handover. Experienced in translating business needs into practical delivery plans, managing risks, dependencies and change impacts, and aligning technical teams, vendors, business owners and senior stakeholders around measurable outcomes.

CORE SKILLS

IT Project & Change Management | Business Analysis & Requirements | Stakeholder Engagement | Change Impact & Adoption | Project Planning & Governance | RAID & Dependencies | Agile & Waterfall Delivery | Process Improvement | Vendor Coordination | QA/UAT & Acceptance | Training & Communications | Release, Go-Live & Hypercare | Operational Readiness | Executive Reporting

SELECTED DELIVERY IMPACT

- Led the MedIQ replacement program through rebuild, migration/reconciliation, testing, training, cutover and stabilization. The documented baseline comprises 38,000+ current users, 5,900+ government healthcare entities and nearly 90,000 affiliated operational locations.

- Conceived and led MedIQ E-Tender end-to-end across 10 linked steps, 30 operational stages, 15 Chairman approvals and 20+ governed roles/permissions, coordinating discovery, business requirements, process redesign, solution delivery, testing, training, deployment and user adoption.

- Led UPA-side delivery of the greenfield, bi-directional integration with the SAP Strategic Medical Warehouses platform from requirements and integration design through data harmonization/mapping, SIT/UAT, go-live, stabilization and production support across request and financial workflows.

SYSTEMS ANALYSIS & DELIVERY

Translate stakeholder needs into AS-IS/TO-BE workflows, functional requirements, user stories, acceptance criteria and interface/data mappings; use UML, Visio and Jira to align engineering, business validation and change control.

Govern scope, milestones, RAID/dependencies, capacity, QA/UAT, cutover, hypercare and operational handover; distinguish technical acceptance from contractual approval.

PROFESSIONAL EXPERIENCE

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt **05/2025 - Present**

Head of the Central Administration for Information Systems & Digital Transformation

Scope: IT Project & Change Delivery | Business Analysis | Process Improvement | Cross-Functional Execution | Stakeholder & Vendor Management | Adoption & Operational Readiness

- Translate strategic and operational priorities into executable project roadmaps and workstreams with defined business requirements, scope, milestones, dependencies, resourcing, decision points, change impacts and release plans across MedIQ and connected services.
- Lead a 54-person multidisciplinary technology organization with 9 direct reports and EGP 150M annual IT budget accountability, coordinating engineering, architecture, analysis, QA/reporting, DevOps, mobile, data, support/customer service, vendors and business stakeholders around shared delivery outcomes.
- Own governance of delivery priorities across the technology portfolio, aligning business needs, investments, vendor delivery, contracts, technical acceptance, risks, dependencies, change impacts and execution readiness with service continuity and user outcomes.
- Directed the MedIQ replacement program through discovery and planning, rebuild, data migration/reconciliation, parallel operation, QA, performance/security validation, stakeholder communications, training, cutover and stabilization; 39,000+ users/staff were trained cumulatively to support adoption and operational readiness.
- Directed the completed Microsoft Dynamics 365 enterprise integration through business requirements and design alignment, APIs/data mapping, SIT/UAT, stakeholder coordination, controlled production deployment, stabilization and operational handover.
- Lead MedIQ E-Tender delivery as a governed enterprise workflow spanning 10 linked steps, 30 operational stages, 15 Chairman approvals and 20+ roles/permissions, with clear acceptance, approval and audit controls.
- Managed the SAP Strategic Medical Warehouses integration as an end-to-end project workstream, coordinating business, UPA and SAP/implementation stakeholders across requirements, process/data mapping, design, security, testing, change readiness, go-live and operational support.

- Govern project release and change readiness across QA/UAT, performance/load testing, security controls, monitoring/logging, rollback/recovery planning, DR readiness, documentation, stakeholder communications, training, adoption and service transition.
- Present program status, risks, dependencies, trade-offs and annual IT budget priorities to senior leadership; track budget versus actual, committed cost and change impact. Led the in-house team delivering the Africa CDC APPM digital platform.

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt **10/2020 - 05/2025**

General Manager - Systems, Applications & Technical Support

- Managed concurrent enterprise application, process-change, modernization, integration and support initiatives, including logistics workflows spanning supplier shipments, pricing, release tracking, customs clearance, procurement and warehouses, while sequencing delivery around business priorities, continuity, dependencies and release constraints.
- Strengthened project and change governance through requirements clarification, estimation, milestone tracking, RAID and cross-team dependency management, QA/UAT gates, change/release controls, stakeholder escalation, RCA, documentation and knowledge transfer.
- Converted manual, paper- and spreadsheet-heavy processes into governed digital workstreams by mapping operational needs, redesigning workflows and implementing approvals, access controls, validation, audit trails, reporting and defined operational ownership.
- Owned end-to-end project delivery from discovery, requirements and solution design through engineering, integration, QA/UAT, deployment, stakeholder communications, training, stabilization and production support, maintaining accountability through adoption and operational handover.

Integral Solutions LLC | Muscat, Oman **05/2016 - 10/2020**

Development Team Leader & Senior Full-Stack Developer

- Led a 20-person development team across 15+ Omani government and enterprise platforms, coordinating client discovery, requirements, design, development, testing, deployment, releases, training and production support as integrated delivery workstreams.
- Contributed extensively to Oman's National Educational Portal (~1M users), delivering LMS capabilities across courses/content, exams, attendance, student/teacher accounts, RBAC, reporting and integrations; also contributed to Maktabi and the Ministry of Education Recruitment System. Developed Maktabi correspondence workflows, reports and database components, with functional testing, release validation and production support.
- Coordinated developers and technical/business stakeholders across delivery, integration, testing, releases, service transition and support using C#/.NET, ASP.NET Web Forms, SQL Server and MySQL.

Keyframe Egypt | Cairo, Egypt **04/2011 - 05/2016**

Development Team Leader & Senior Full-Stack Developer

- Delivered or led 150+ major and mid-sized client engagements across diverse sectors, balancing concurrent stakeholder priorities, requirements, delivery schedules, change requests and technical work while progressing from hands-on engineering to development-team leadership.
- Owned analysis, C#/.NET engineering, database/reporting design, testing, deployment and support end-to-end while balancing concurrent client priorities, including Yashfeen - associated with confirmed ITIDA competition/award recognition. Selected historical projects include Rate Your Services and Kasr Al Ainy Liver Tumor Unit Management System.

Egyptian Armed Forces | Egypt **04/2008 - 10/2010**

Linux Systems & Web Developer

- Built hands-on delivery experience through Linux From Scratch, Linux optimization/hardening and ASP.NET/SQL Server application implementation.

IT PROJECT, CHANGE & DELIVERY CAPABILITIES

Project & Change Governance: Project scope and plans, milestones, critical dependencies, RAID, change control, change-impact awareness, decision governance, executive/steering reporting, prioritization, resource/capacity planning, budgets, vendors and benefits realization.

Business Analysis & Delivery Lifecycle: Discovery workshops, requirements elicitation and clarification, process/workflow analysis, planning, estimation, resourcing, solution alignment, QA/UAT, acceptance, release/cutover, rollback planning, stakeholder communications, training, adoption, stabilization, service transition and operational handover.

Platforms & Technology Context: Enterprise platforms, Microsoft Dynamics 365, REST/SOAP/GraphQL APIs, C#/.NET, ReactJS, Node.js, PostgreSQL, SQL Server, Redis, Docker; Kubernetes (working knowledge), Power BI, Apache Superset and CI/CD governance.

Leadership & Stakeholders: Cross-functional team leadership, business/technology translation, stakeholder engagement, vendor and partner management, executive escalation, user readiness, incident/RCA oversight and continuous improvement.

SELECTED PROGRAM & GOVERNANCE CONTRIBUTIONS

- National Pharmaceutical Track & Trace Program (2021-2024) - contributed to multi-agency governance, compliance and interoperability.
- Board Member - National Blood Operations Oversight (2021-2024), representing UPA and contributing to digital governance, data integrity and technology standards.
- Member - Egypt Digital Transformation Committee supporting the World Bank Group B-READY Assessment (2025-2026).

EDUCATION

B.Sc. in Computer Science, Faculty of Computers & Informatics, Zagazig University | 2003-2007
Languages: Arabic - Native | English - Professional Working Proficiency
