Dear Hiring Manager,

I am applying for Digital Transformation Director, Transformation Program Director, or related enterprise leadership opportunities. With more than 18 years of experience across government, healthcare, education, and commercial environments, I lead transformation from strategy and architecture through implementation, adoption, governance, and measurable operational improvement.

As Chief Technology & Digital Transformation Officer, I lead technology strategy and transformation across procurement, warehousing, inventory, demand planning, enterprise data, analytics, and government operations. I direct multidisciplinary teams and partners while governing enterprise applications, data platforms, integration, security, quality, service performance, and long-term roadmaps.

My experience includes an EGP 150M+ technology portfolio, 150+ digital initiatives, 39,000+ staff reached through adoption and training, more than 99% availability across critical platforms, and approximately 70% faster executive reporting preparation. I also contributed to the World Bank Group B-READY Egypt assessment and governance of national pharmaceutical track-and-trace and blood-supply initiatives.

I would bring a disciplined transformation approach that links institutional priorities, stakeholder alignment, architecture, delivery governance, change and adoption, data-driven decision-making, and sustained operational capability.

I would welcome the opportunity to discuss how this experience can contribute to your organization. Thank you for your consideration.

Sincerely,

Mahmoud Salama

DIGITAL TRANSFORMATION DIRECTOR | ENTERPRISE TECHNOLOGY & PROGRAM LEADER
