18+ Years in technology	EGP 150M+ Technology portfolio	40+ Professionals led
12,000+ Public-sector entities supported	150+ Digital initiatives	12M+ Records processed daily

EXECUTIVE VALUE PROPOSITION

Technology and digital-transformation executive with 18+ years of experience connecting institutional priorities to secure architecture, governed delivery, adoption, and measurable operational outcomes. Combines public-sector leadership, enterprise architecture, software engineering, data platforms, systems integration, vendor governance, and GCC delivery experience.

THREE SIGNATURE CASE STUDIES

MedIQ / Unified Procurement & Medical Supply Ecosystem

Led architecture and governance of an integrated 10-platform ecosystem supporting RFPs, approvals, inventory, distribution, supplier processes, and supply-chain controls across 12,000+ public-sector entities. The environment processed 320,000+ automated validation checks and strengthened transparency, planning, and stock visibility.

Selected technology: ASP.NET, C#, React.js, Node.js, GraphQL, MySQL, APIs

Egypt National Health Sector Data Warehouse & Analytics Layer

Led architecture of a governed enterprise data environment with PostgreSQL, data pipelines, master data, operational data stores, validation controls, Power BI, and Apache Superset. The reporting layer processes 12M+ records daily and contributed to approximately 70% faster executive reporting preparation.

Selected technology: PostgreSQL, SQL, Data Pipelines, MDM, ODS, Power BI, Apache Superset

Microsoft Dynamics 365 ERP & CRM Integration

Directed integration architecture connecting procurement, operations, stakeholder services, reporting, and data platforms with Dynamics 365 through controlled exchange, mapping, validation, reconciliation, workflow alignment, monitoring, and audit controls.

Selected technology: Microsoft Dynamics 365, REST APIs, Data Connectors, Mapping, Audit Logs

TRANSFORMATION METHOD

1. Discover and diagnose | 2. Define outcomes and governance | 3. Design the target state | 4. Deliver controlled increments | 5. Enable adoption and operations | 6. Measure, improve, and sustain

ADDITIONAL PORTFOLIO HIGHLIGHTS	
National Pharmaceutical Track & Trace Program Shaped program vision, governance, compliance model, cross-agency coordination, interoperability principles, and the technology roadmap across UPA, the Egyptian Drug Authority, and the Ministry of Health. Governance, Compliance, Interoperability, Program Roadmap	Oman National Educational Portal Led full-cycle delivery and cross-border engineering coordination for a large-scale e-learning and academic-management platform aligned with local e-government standards. ASP.NET, C#, SQL Server, LMS, CMS, Dashboards
Health Technology Assessment Platform Directed digitization of evidence submission, controlled review, assessment tracking, role-based access, audit traceability, dashboards, and compliance reporting. Workflow Engine, Dashboards, Audit Logs, RBAC, Compliance Reporting	Strategic Analytics & Reporting Layer Real-time KPI visibility, automated validation, quality assurance, and executive operational intelligence. Power BI, Apache Superset, SQL, PostgreSQL
Tenders, Contracts & SLA Visibility Digital approvals, vendor scoring, contract workflows, fulfillment tracking, alerts, ownership dashboards, escalation, and audit traceability. .NET, MySQL, Workflow, RBAC, BI Dashboards	Additional Enterprise Applications Electronic pharmacy, correspondence, asset management, crisis management, recruitment ATS, customer care, notifications, SMS gateway, and unified mobile services. .NET, APIs, Databases, Workflow, Mobile Integration

LEADERSHIP & GOVERNANCE

- Digital Transformation Committee Member - World Bank Group B-READY Egypt Assessment (2025-2026).
- Board Member - National Blood Operations Oversight, appointed by Egypt's Minister of Health (2021-2024).
- Governance Lead - National Pharmaceutical Track & Trace Program, UPA / EDA / Ministry of Health (2021-2024).
- International Speaker - Bioinformatics & Digital Health, Manama Health Congress & Expo, Bahrain (2022).
- Digital Health & Technology Contributor - Africa Health ExCon, Cairo (2021-Present).

CORE CAPABILITY STACK

Executive & Governance: Technology Strategy, Digital Transformation, IT Operating Models, Enterprise Architecture, Portfolio Governance, Vendor Governance, Executive Stakeholder Management, Program Governance, Change & Adoption

Architecture & Integration: Capability Mapping, Target-State Architecture, Solution Architecture, REST APIs, GraphQL, Integration Governance, Data Contracts, Microsoft Dynamics 365 ERP/CRM Integration, Application Modernization

Data & Analytics: PostgreSQL, SQL Server, MySQL, Data Pipelines, Master Data Management, Operational Data Stores, Data Governance, Power BI, Apache Superset, Forecasting Support, Risk & Anomaly Analysis

Engineering & Delivery: C#, ASP.NET Core, .NET Framework, Entity Framework, React.js, Node.js, JavaScript, HTML5, CSS3, Agile, SDLC, QA, Git, Docker, Jenkins, CI/CD, Jira, Postman

Security & Operations: RBAC, API Security, Secure Coding, Audit Logs, Data Protection, Backup & Recovery Governance, Monitoring, Release Governance, Service Governance, Technical Documentation

Full 12-page portfolio and supporting evidence available for shortlisted opportunities.
