

AWS

WRITTEN EXAM REBUILD

AWS Domain 4 - Billing, Pricing & Support

A 2026 refresh of your billing notebook: purchasing models, cost governance, Organizations, cost tools, Trusted Advisor and the current Support-plan transition.

Your handwritten scan rebuilt professionally

Current AWS official refresh · Aug 2026

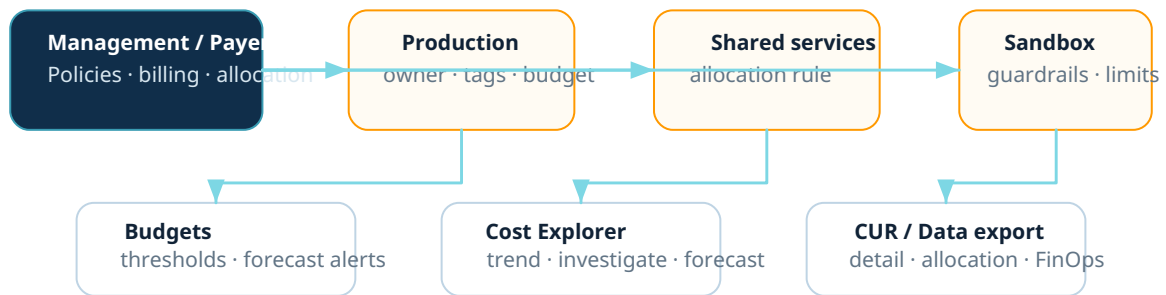

CLF-C02 weight: 12%

Source
boundary

Your 10-page scan covers pricing models, TCO, Cost Explorer, Budgets, CUR, Organizations, Trusted Advisor, Systems Manager, License Manager, ACM, AMS/Professional Services/APN/Marketplace and legacy Support-plan tables. The highest-risk stale content is the Support-plan section.

1. Cost is architecture, not accounting afterthought

AWS Organizations - consolidated governance & billing

EC2: لا يكفي أن تعرف سعر review budget و account/tag و owner التكلفة تحتاج

2. Purchasing models

Model	Best fit	Main risk	Manager sentence
On-Demand	Unknown, short-lived or variable demand.	Higher unit cost if used for a stable baseline forever.	Buy flexibility until the usage pattern is proven.
Savings Plans	Stable compute usage where commitment is justified.	Over-commitment.	Commit only the stable base after measuring.
Reserved Instances	Specific steady service usage and reservation benefits.	Wrong term/configuration or unused reservation.	Understand service-specific flexibility before purchase.
Spot	Interruptible, fault-tolerant batch/workers.	Capacity can be reclaimed.	Never make irreplaceable production depend on one Spot instance.
Dedicated Host/ Instance	Licensing, isolation or compliance-driven cases.	Higher cost / complexity.	Use only when a real requirement justifies it.
Capacity Reservation	Need EC2 capacity available in a specific AZ.	Paying for reserved capacity without matching usage.	Capacity guarantee and price discount are separate decisions.

3. Cost tools - know the job of each

AWS Budgets

Thresholds, forecasts and alerts/actions for cost or usage.

إنذار مبكر و budget guardrail.

Cost Explorer

Interactive analysis of cost/usage trends, drivers and forecasts.

تحليل السبب والاتجاه.

Cost & Usage Reports

Detailed cost and usage data for deeper reporting/allocation.

أدق بيانات billing/usage.

Pricing Calculator

Estimate planned workload or bill changes before commitment.

Estimate قبل القرار.

Organizations

Consolidated account governance/billing; use accounts and tags for ownership.

.Multi-account + consolidated billing

Trusted Advisor

Automated recommendations/checks; combine with Well-Architected workload reviews.

Checks وليست governance كاملة.

4. Critical 2026 correction - AWS Support plans

Your handwritten table is historical. Do not walk into the interview quoting the old Developer / Business / Enterprise On-Ramp structure as the current plan catalogue.

2026 current direction	What to remember	Interview use
Basic	Account/billing assistance plus self-service resources and health/service tools.	Not a production technical-response plan.
Business Support+	Current enhanced business support with 24x7 expert access and fast critical response.	Production operations needing expert support.
Enterprise Support	Mission-critical support with designated strategic/technical guidance and fastest enterprise response.	Critical enterprise estate and complex operations.
Unified Operations	Highest integrated operations/support model in the current documentation.	Know the name and purpose; exact commercial fit is an organizational decision.

AWS has announced end-of-support transitions for Developer Support, Business Support and Enterprise On-Ramp effective January 1, 2027; existing customers may still be on them during 2026.

5. WaCA FinOps answer

1 · Allocate

Account + project/
country/owner tags.

2 · Alert

Budgets and anomaly
signals before month-
end surprise.

3 · Optimize

Rightsize, schedule,
storage lifecycle,
commitments.

4 · Protect

Do not trade away
backup, logging or
security to save
money.

7. Interview questions generated from the billing notes

Q160 On-Demand vs Savings vs Reserved vs Spot

Q161 Budgets vs Cost Explorer vs CUR

Q162 Trusted Advisor vs Well-Architected

Q163 Current 2026 Support landscape

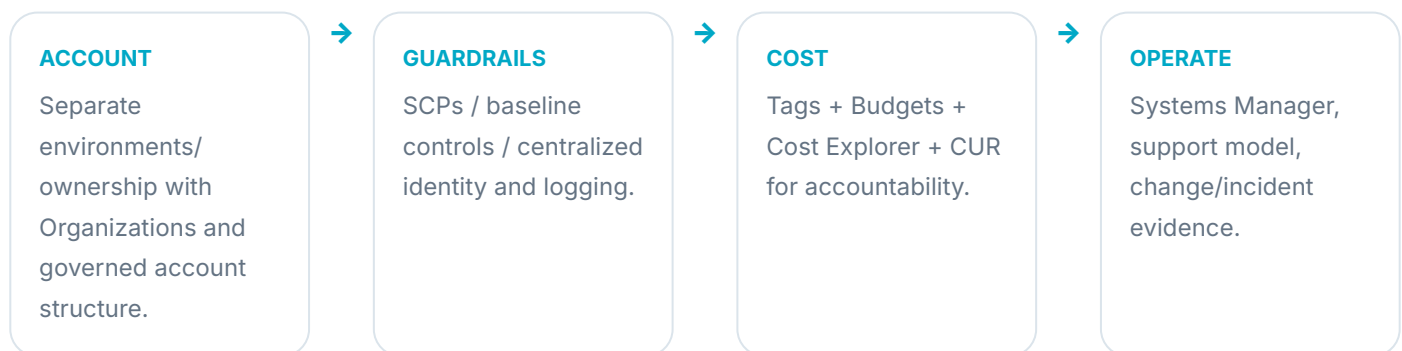

Q164 Runaway AWS bill incident

Q172 Multi-account cost allocation

Full 10-page notebook coverage

pp. 1-2	Pricing models, S3/RDS cost drivers, TCO, Pricing Calculator, Cost Explorer, Budgets, CUR and tags.	Cost tools
pp. 3-5	Organizations, consolidated billing, SCPs, Control Tower, Systems Manager, Trusted Advisor, License Manager, ACM.	Governance
pp. 6-8	AMS, Professional Services, APN, Marketplace, Personal Health Dashboard/ AWS Health, Support-plan basics.	Support
pp. 9-10	Legacy Developer/Business/Enterprise support features, response targets, TAM, Concierge and event management.	Current-plan correction

Governance answer frame for WaCA
