PROFESSIONAL SUMMARY

CTO/CDTO-profile technology executive with 18+ years across Egypt and Oman, progressing from hands-on Linux and full-stack engineering to enterprise-wide technology, engineering and transformation leadership across 200+ technology projects across the career. Leads a 54-person multidisciplinary technology organization with 9 direct reports and enterprise-portfolio accountability across strategy, architecture, applications, delivery, IT operations, integration, data governance and resilience. Combines executive decision ownership with deep technical judgment across government, healthcare and national-scale digital platforms.

EXECUTIVE CAPABILITIES

Technology Strategy & Roadmaps | Digital Transformation | Enterprise & Solution Architecture | Enterprise Platforms | Program & Portfolio Delivery | Software & Applications Leadership | Integration & Data Governance | Infrastructure, Security & Resilience Oversight | IT Service Management | Vendor & Commercial Governance | Build-vs-Buy & TCO | Technology Investment & Financial Governance | Executive Stakeholder Alignment

SELECTED EXECUTIVE IMPACT

- Lead a 54-person technology organization with 9 direct reports and EGP 150M annual IT budget accountability, setting enterprise technology priorities across platforms, architecture, infrastructure, security, data and transformation.
- Led the end-to-end re-architecture and replacement of MedIQ through UPA's in-house technology organization. The Pharmaconex Awards 2026 – Excellence in Digital Transformation winner serves 38,000+ current users, 5,900+ government healthcare entities, nearly 90,000 affiliated operational locations and 2,000+ suppliers.
- Directed procurement workflow digitization and reporting modernization with governed approvals, validation, traceability, stakeholder adoption and operational ownership.
- Directed the completed Microsoft Dynamics 365 enterprise integration across procurement, supply, inventory, finance and reporting, governing process alignment, integration contracts, data mapping, testing, security, change control and production transition.
- Established enterprise resilience and production-readiness governance covering capacity planning, performance testing, monitoring/logging, F5 BIG-IP controls, PostgreSQL production/replica architecture, DR with manual primary-to-DR failover, governed database backup and recovery and off-site backup/recovery.
- Govern a national digital-platform portfolio spanning MedIQ, E-Tender, mobile inventory, SAP Strategic Medical Warehouses, Dynamics 365, asset maintenance and data/AI capabilities; align investment and delivery with value, risk and continuity.

SYSTEMS ANALYSIS & DELIVERY

Translate stakeholder needs into AS-IS/TO-BE workflows, functional requirements, user stories, acceptance criteria and interface/data mappings; use UML, Visio and Jira to align engineering, business validation and change control.

Govern scope, milestones, RAID/dependencies, capacity, QA/UAT, cutover, hypercare and operational handover; distinguish technical acceptance from contractual approval.

PROFESSIONAL EXPERIENCE

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt **05/2025 - Present**

Head of the Central Administration for Information Systems & Digital Transformation

Scope: Enterprise Technology Leadership | Transformation Portfolio | Investment Decisions | Architecture Direction | Digital Platforms | Executive Stakeholders

- Own enterprise technology strategy, portfolio direction and investment priorities across applications, data, integration, infrastructure, security and digital services; set multi-year modernization roadmaps and transformation sequencing.
- Lead a 54-person technology organization with 9 direct reports across software/applications, analysis, QA/reporting, DevOps, mobile, data, support/customer service and delivery governance.
- Govern the enterprise technology portfolio and platform lifecycle across procurement, supply, inventory, tendering, finance integration, analytics and connected digital services, balancing value, reliability, scalability, security, continuity, cost and government operating constraints.
- Lead technology-selection, build-vs-buy and vendor decisions with relevant technical teams, using architecture risk, capability fit, TCO, lifecycle cost and PoCs when needed; govern technical acceptance and production readiness for sourced solutions.
- Set enterprise integration and data-governance direction; led UPA's greenfield, bi-directional integration with the SAP Strategic Medical Warehouses system, owning requirements, architecture, master-data mapping/harmonization, security, UAT, go-live and production support across request and financial workflows.

- Own service resilience and production-readiness governance including Private Cloud leadership, capacity planning, performance/load testing, monitoring/logging, incident escalation and RCA, PostgreSQL production/replica architecture, Redis caching, containerized services, F5 BIG-IP controls, DR and backup/recovery.

- Translate legal, regulatory, cybersecurity and governance requirements into operating and technology controls including least privilege, RBAC, segregation of duties, audit trails, traceability, retention, data protection and controlled approvals.
- Present technology strategy, EGP 150M annual IT budget priorities, trade-offs and risks to senior leadership; govern investments using business cases, TCO, budget-vs-actual, committed cost and financial impact of change. Direct data architecture, practical ODS work, HTA platform design/development and phased AI capabilities.

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt **10/2020 - 05/2025**

General Manager - Systems, Applications & Technical Support

- Directed enterprise application and service modernization, evolving established .NET Framework/Telerik solutions toward ReactJS/Node.js services, C#/.NET APIs, PostgreSQL, Redis, Docker and Apache Superset while protecting operational continuity.
- Strengthened IT service and engineering governance through ticket ownership, escalation, service KPIs, incident/RCA practices, architecture/design reviews, QA/release gates, documentation and knowledge transfer.
- Converted manual, paper- and spreadsheet-heavy processes into governed digital workflows with role-based access, multi-level approvals, validation, audit trails, reporting and clear operational ownership.
- Owned the full solution lifecycle from business requirements and architecture through engineering, integration, QA/UAT, deployment, adoption and continuous improvement, building the delivery foundation for broader enterprise transformation.

Integral Solutions LLC | Muscat, Oman **2016 - 2020**

Development Team Leader & Senior Full-Stack Developer

- Led a 20-person development team across 15+ Omani government and enterprise platforms, combining people leadership with hands-on technical judgment across solution design, delivery, releases and production support.
- Contributed extensively to Oman's National Educational Portal (~1M users), delivering LMS capabilities across courses/content, exams, attendance, student/teacher accounts, RBAC, reporting and integrations; also contributed to Maktabi and the Ministry of Education Recruitment System. Developed Maktabi correspondence workflows, reports and database components, with functional testing, release validation and production support.
- Designed secure government workflows, reporting, database and integration components across C#/.NET, ASP.NET Web Forms, SQL Server and MySQL.

Keyframe Egypt | Cairo, Egypt **04/2011 - 05/2016**

Development Team Leader & Senior Full-Stack Developer

- Progressed from hands-on engineering to development-team leadership while delivering or leading 150+ major and mid-sized engagements across government, healthcare, education, construction, automotive, events and commercial sectors.
- Owned analysis, C#/.NET engineering, database/reporting design, testing, deployment and support across multilingual and RTL solutions, including Yashfeen - associated with confirmed ITIDA competition/award recognition. Selected historical projects include Rate Your Services and Kasr Al Ainy Liver Tumor Unit Management System.

Egyptian Armed Forces | Egypt **04/2008 - 10/2010**

Linux Systems & Web Developer

- Built an early systems-and-software foundation through Linux From Scratch, kernel modules, optimization/hardening and secure ASP.NET/SQL Server application development.

EXECUTIVE TECHNOLOGY TOOLKIT

Governance: Technology strategy, operating models, portfolio/roadmaps, investment prioritization, executive stakeholders, vendors/contracts, TCO and risk/value.

Operations: ITSM, service KPIs, incident/problem/RCA, release/change, production readiness, monitoring/logging, capacity planning, continuity and DR.

Platforms & Data: Enterprise/Solution Architecture, SAP/Dynamics 365, APIs, PostgreSQL/SQL Server/Redis, Docker; Kubernetes (working knowledge), F5 BIG-IP, RBAC, Power BI/Superset and data governance.

Leadership & Delivery: Organization/capability growth, multidisciplinary leadership, SDLC, QA/UAT, stakeholder/vendor management, Agile/Waterfall, CI/CD and AI-assisted engineering/analysis.

SELECTED EXECUTIVE & GOVERNANCE CONTRIBUTIONS

- National Pharmaceutical Track & Trace Program (2021-2024) - contributed to multi-agency governance, compliance and interoperability.
- Board Member - National Blood Operations Oversight (2021-2024), representing UPA and contributing to digital governance, data integrity and technology standards.
- Member - Egypt Digital Transformation Committee supporting the World Bank Group B-READY Assessment (2025-2026).

Education: B.Sc. Computer Science, Zagazig University (2003–2007) | Arabic: Native | English: Professional Working Proficiency
