PROFESSIONAL SUMMARY

CIO/IT Director-profile technology executive with 18+ years across Egypt and Oman, progressing from hands-on systems and software engineering to enterprise-wide IT leadership across 200+ technology projects across the career. Leads a national-scale multidisciplinary technology organization across strategy, operating-model evolution, enterprise platforms, service resilience, vendor governance and investment decisions. Combines executive accountability with deep technical judgment to translate business priorities, regulatory requirements and operating constraints into reliable digital services and measurable outcomes across government and healthcare.

CORE SKILLS

Technology Strategy & IT Operating Models | **IT Portfolio & Investment Governance** | Enterprise Platforms & Modernization | Organization & Capability Leadership | Vendor, Contract & Commercial Governance | IT Service Management, SLAs & Production Operations | Cybersecurity Governance, Risk & Controls | **Business Continuity & DR** | Data & AI Strategy | Build-vs-Buy & TCO | Executive Stakeholder Alignment

SELECTED EXECUTIVE IMPACT

- Lead a 54+ engineer IT organization with 9 direct reports and EGP 150M annual IT budget accountability across enterprise applications, infrastructure, security, data, service operations and modernization.
- Led the end-to-end re-architecture and replacement of MedIQ through UPA's in-house technology organization. The award-winning national platform serves 38,000+ current users, 5,900+ government healthcare entities, nearly 90,000 affiliated operational locations and 2,000+ suppliers; it won the Pharmaconex Awards 2026 – Excellence in Digital Transformation.
- Directed procurement workflow digitization and reporting modernization with governed approvals, validation, traceability, stakeholder adoption and operational ownership.
- Directed the completed Microsoft Dynamics 365 enterprise integration across procurement, supply, inventory, finance and reporting, governing process alignment, integration contracts, data mapping, testing, security, change control and production transition.
- Established enterprise resilience and production-readiness governance covering capacity planning, performance testing, monitoring/logging, F5 BIG-IP controls, PostgreSQL production/replica architecture, DR with manual primary-to-DR failover, governed database backup and recovery and off-site backup/recovery.
- Govern a national digital-platform portfolio spanning MedIQ, E-Tender, mobile inventory, SAP Strategic Medical Warehouses, Dynamics 365, asset maintenance and data/AI capabilities. Align investment and delivery with value, risk, continuity and UPA's health-data analytics and evidence-based decision-support agenda.

SYSTEMS ANALYSIS & DELIVERY

Translate stakeholder needs into AS-IS/TO-BE workflows, functional requirements, user stories, acceptance criteria and interface/data mappings; use UML, Visio and Jira to align engineering, business validation and change control.

Govern scope, milestones, RAID/dependencies, capacity, QA/UAT, cutover, hypercare and operational handover; distinguish technical acceptance from contractual approval.

PROFESSIONAL EXPERIENCE

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt **05/2025 - Present**

Head of the Central Administration for Information Systems & Digital Transformation

Scope: IT Strategy | IT Operating Model | Enterprise Applications | Service Delivery | Infrastructure & Security | Vendor Governance

- Own technology strategy, portfolio direction and investment priorities across applications, data, integration, infrastructure, security and digital services; set multi-year modernization roadmaps and investment sequencing.
- Lead a 54+ engineer IT organization with 9 direct reports across enterprise applications, analysis, QA/reporting, DevOps, mobile, data, support/customer service and delivery governance.
- Govern the enterprise technology portfolio and platform lifecycle across procurement, supply, inventory, tendering, finance integration, analytics and connected digital services, balancing value, reliability, scalability, security, continuity, cost and government operating constraints.
- Lead technology-selection, build-vs-buy and vendor decisions with relevant technical teams, using architecture risk, capability fit, TCO, lifecycle cost and PoCs when needed; govern technical acceptance and production readiness for sourced solutions.
- Set enterprise integration and data-governance direction; led UPA's greenfield, bi-directional integration with the SAP Strategic Medical Warehouses system, owning requirements, architecture, master-data mapping/harmonization, security, UAT, go-live and production support across request and financial workflows.
- Own service resilience and production-readiness governance across Private Cloud capacity, performance/load testing, monitoring/logging, incident/RCA, PostgreSQL production/replica architecture, Redis, containers, F5 BIG-IP, DR, governed database backup and recovery and off-site recovery.

- Translate legal, regulatory, cybersecurity and governance requirements into operating and technology controls including least privilege, RBAC, segregation of duties, audit trails, traceability, retention, data protection and controlled approvals.

- Present IT strategy, EGP 150M annual budget priorities, trade-offs and risks to senior leadership; govern investments using business cases, TCO, budget-vs-actual, committed cost and financial impact of change. Direct data architecture, practical ODS (Operational Data Store) work, HTA platform design/development and phased AI capabilities.

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt **10/2020 - 05/2025**

General Manager - Systems, Applications & Technical Support

- Directed enterprise applications, technical support and customer-service delivery while modernizing the application estate without disrupting operational continuity, evolving .NET Framework/Telerik solutions toward ReactJS/Node.js services, C#/.NET APIs, PostgreSQL, Redis, Docker and Apache Superset.
- Strengthened IT service and engineering governance through ticket ownership, escalation, service KPIs, incident/RCA practices, architecture/design reviews, QA/release gates, documentation and knowledge transfer.
- Converted manual, paper- and spreadsheet-heavy processes into governed digital workflows with role-based access, multi-level approvals, validation, audit trails, reporting and clear operational ownership.
- Owned service and solution lifecycle governance from requirements through production support, integrating business analysis, architecture, engineering, QA/UAT, deployment, training and continuous improvement.

Integral Solutions LLC | Muscat, Oman **2016 - 2020**

Development Team Leader & Senior Full-Stack Developer

- Led a 20-person development team delivering and supporting 15+ Omani government and enterprise platforms, coordinating application delivery, releases and production support for public-sector services.
- Contributed extensively to Oman's National Educational Portal (~1M users), delivering LMS capabilities across courses/content, exams, attendance, student/teacher accounts, RBAC, reporting and integrations; also contributed to Maktabi and the Ministry of Education Recruitment System. Developed Maktabi correspondence workflows, reports and database components, with functional testing, release validation and production support.
- Designed secure government workflows, reporting, database and integration components across C#/.NET, ASP.NET Web Forms, SQL Server and MySQL.

Keyframe Egypt | Cairo, Egypt **04/2011 - 05/2016**

Development Team Leader & Senior Full-Stack Developer

- Led delivery across 150+ major and mid-sized client engagements spanning government, healthcare, education and commercial sectors, progressing from hands-on engineering into development-team leadership and customer-facing delivery accountability.
- Owned analysis, C#/.NET engineering, database/reporting design, testing, deployment and support across multilingual and RTL solutions, including Yashfeen - the healthcare solution associated with confirmed ITIDA competition/award recognition. Selected historical projects include Rate Your Services and Kasr Al Ainy Liver Tumor Unit Management System.

Egyptian Armed Forces | Egypt **04/2008 - 10/2010**

Linux Systems & Web Developer

- Built an early foundation through Linux From Scratch, Linux optimization/hardening and secure ASP.NET/SQL Server applications, grounding later ownership of enterprise platforms and service operations.

TECHNOLOGY, SERVICE & OPERATIONS CAPABILITIES

Executive Governance: Technology strategy, IT operating models, portfolio and roadmaps, budget/investment prioritization, executive stakeholders, vendor and contract governance, TCO, risk and value realization.

Service & Operations: ITSM, service desk and support governance, service KPIs, incident/problem management, RCA, release/change governance, production readiness, monitoring/logging, capacity planning, continuity and disaster recovery.

Platforms, Security & Data: Enterprise/Solution Architecture, SAP & Dynamics 365 integration, REST/SOAP/GraphQL APIs, PostgreSQL, SQL Server, Redis, Docker; Kubernetes (working knowledge), F5 BIG-IP, RBAC, Power BI, Apache Superset and data governance.

Leadership & Delivery: Organization design and capability growth, multidisciplinary technology leadership, SDLC, QA/UAT, vendor management, stakeholder alignment, Agile/Waterfall delivery, CI/CD governance and AI-assisted engineering/analysis.

EDUCATION

B.Sc. in Computer Science, Faculty of Computers & Informatics, Zagazig University | 2003-2007
Languages: Arabic - Native | English - Professional Working Proficiency
