

AWS

WRITTEN EXAM REBUILD

AWS Domain 3 - Technology & Services

A manager-focused rebuild of your 25-page technology notebook: service selection, hybrid field architecture, resilience, migration, monitoring and current-service corrections.

Your handwritten scan rebuilt professionally

Current AWS official refresh · Aug 2026

CLF-C02 weight: 34%

Source boundary

Your notes cover compute, S3/storage classes, EC2 storage, CDN/networking, databases, migration, analytics/AI, developer tools, IaC, messaging, CloudWatch and CloudTrail. Current CLF-C02 Domain 3 is 34% and explicitly tests compute, database, network, storage, AI/analytics and other in-scope services.

1. Think in capabilities

Compute

EC2 · Auto Scaling · ELB · Lambda · Fargate

Choose by control vs operational burden; use multiple AZs when availability requires it.

اختيار compute حسب التحكم وعبء التشغيل.

Storage

S3 · EBS · EFS · Backup · Storage Gateway

Object vs block vs shared file; lifecycle and restore time matter.

.Object / block / shared file

Network

VPC · SG · NACL · Route 53 · VPN · Direct Connect

Private-by-default, least-privilege flows, tested hybrid connectivity.

شبكة خاصة واتصال هجين مختبر.

Database

RDS · Aurora · DynamoDB · ElastiCache

Managed DB where fit; Multi-AZ is availability, read replicas are not the same.

.HA مع Managed DB

Integration

SQS · SNS · EventBridge · API Gateway

Decouple, fan-out and route events; build retry/idempotency into business flows.

.Queue / fan-out / event routing

Migration

AWS Transform MGN · DMS · DataSync

Assess dependencies, pilot, cutover, rollback, reconcile.

.rollback و pilot مع Migration

Analytics

Athena · Glue · Kinesis · Redshift · QuickSight

Choose by query, ETL, stream, warehouse and visualization need.

تحليل حسب نوع البيانات.

Operations

CloudWatch · CloudTrail · Config · Systems Manager

Metrics/logs, audit, configuration and fleet operations are different controls.

.audit + config + patching + تشغيل

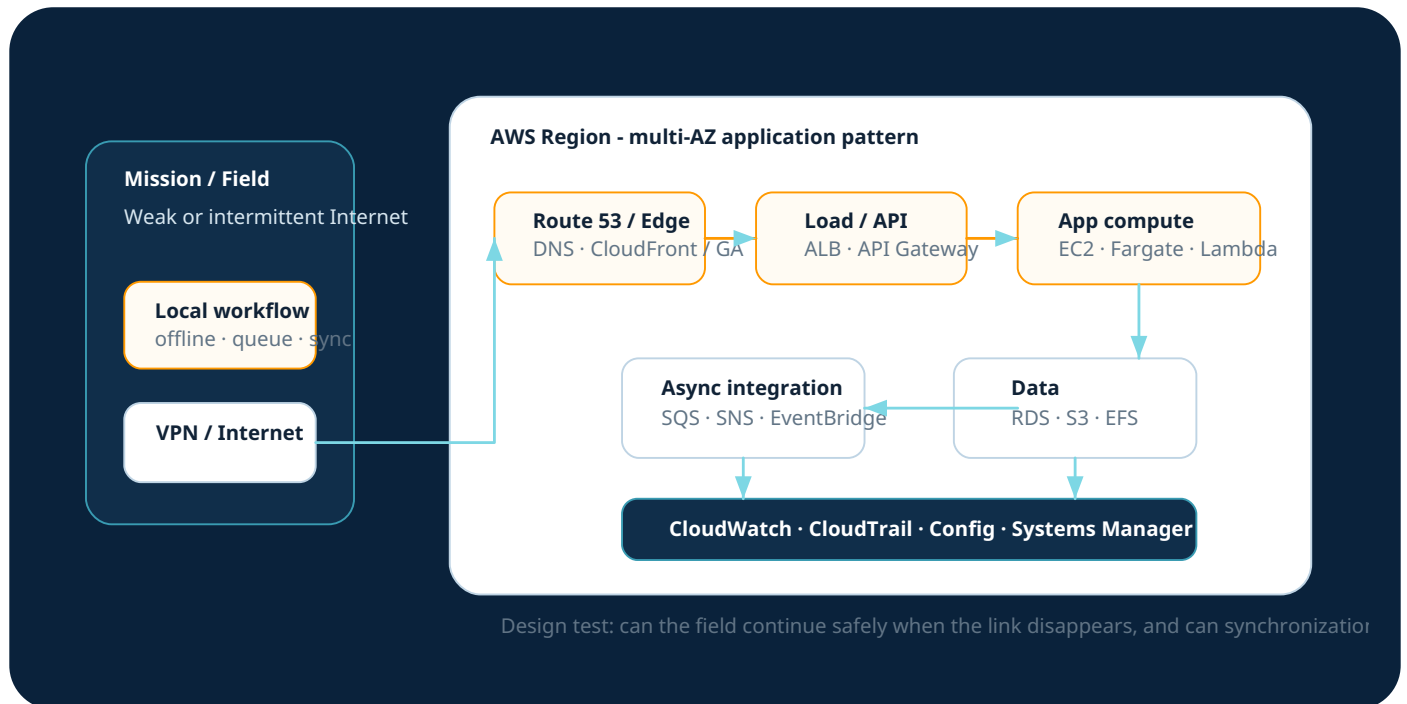

IaC / DevOps

CloudFormation · CodeBuild · CodePipeline · X-Ray

Repeatable infrastructure and deployment; do not over-focus on developer tooling for this manager role.

IaC أهم من حفظ كل developer tool.

2. Architecture that matches the WaCA role

Manager lens: the strongest answer is not "put it on AWS." It is "make the field workflow resilient to connectivity loss, keep transactions idempotent, and prove recovery."

3. High-value service comparisons

Question	Choose	Do not confuse	Arabic cue
Object / block / shared file?	S3 / EBS / EFS	Storage type comes before brand-name memorization.	نوع التخزين أولاً
Server / function / serverless container?	EC2 / Lambda / Fargate	Supportability matters as much as scaling.	Control vs ops burden
Queue / fan-out / event routing?	SQS / SNS / EventBridge	Different delivery semantics.	Queue / pub-sub / event bus
HA or read scale?	RDS Multi-AZ / read replica	A read replica is not the same availability control.	HA ≠ read scale
Content cache / app acceleration / S3 transfer?	CloudFront / Global Accelerator / S3 Transfer Acceleration	Only CloudFront is the CDN/ cache pattern.	Cache / network path / S3
Metrics / audit / config?	CloudWatch / CloudTrail / Config	All three appear in real incidents.	تشغيل / من فعل / configuration

4. Current-state corrections

- CloudWatch Events

Use Amazon EventBridge terminology for new designs. AWS states EventBridge is the evolution of CloudWatch Events and new features go to EventBridge.
- Server Migration Service

The notebook references AWS SMS. AWS sunset that migration path; the current rehosting service is AWS Transform MGN, formerly Application Migration Service.
- AWS Data Pipeline

AWS closed new-customer access in July 2024. For new designs, consider current orchestration/ETL options such as AWS Glue, Step Functions or managed workflows based on the use case.
- Snow Family

Your notes are useful conceptually for offline/edge transfer, but service availability is changing in 2026. In interviews, focus on the offline-transfer requirement and verify the currently available option before proposing it.

5. Field-ready decision sequence

01	02	03	04
Business flow		Service pattern	Operate & recover
What must still work when the		Choose compute/ storage/network/	Monitoring, patching, backup,
AWS Domain 3 · MSF WaCA interview study guide · verified Aug 2026			

mission loses
connectivity?

Data & latency

Size, sensitivity,
sync, consistency,
residency.

integration
deliberately.

RTO/RPO,
runbooks.

7. Interview questions generated from the technology notes

Q143 VPC public/private architecture

Q144 EC2 vs Lambda vs Fargate

Q145 S3 vs EBS vs EFS

Q147 RDS Multi-AZ vs read replica

Q155 SQS vs SNS vs EventBridge

Q156 Infrastructure as code

Q168 Legacy migration with minimal downtime

Q169 Low-connectivity mission architecture

Q189 Storage Gateway vs DataSync vs Transfer vs Snow

Q190 RDS/Aurora vs DynamoDB

Q191 Glue/Athena/QuickSight/Kinesis

Q192 CloudFormation vs Beanstalk vs Systems Manager

Q193 CloudFront vs Global Accelerator vs Transfer Acceleration

Q194 AI/ML service selection

Q195 SQS FIFO + SNS + EventBridge

Full 25-page notebook coverage

pp. 1-3	EC2 purchase/host models, ELB/Auto Scaling, Lambda, Fargate, Lightsail.	Compute
pp. 4-9	S3, storage classes/lifecycle, Glacier, Outposts, EBS, Instance Store, EFS, Storage Gateway, AWS Backup.	Storage
pp. 10-13	CloudFront, Global Accelerator, VPC/subnets/routes/IGW/NACL, peering, Route 53, API Gateway, Direct Connect/VPN.	Network
pp. 14-15	RDS/Aurora, DynamoDB, DocumentDB, ElastiCache, Neptune, DMS.	Database
pp. 16-17	Snow family, migration, DataSync, Redshift and data transfer.	Hybrid transfer
pp. 18-20	EMR, data pipeline, Athena, Glue, Kinesis, QuickSight, Comprehend, Polly, Rekognition, SageMaker, Translate, Lex.	Analytics / AI
pp. 21-23	X-Ray, developer/Code services, Elastic Beanstalk, CloudFormation, OpsWorks, SQS/SNS.	Deploy / integrate
pp. 24-25	CloudWatch logs/metrics/events/alarms and CloudTrail audit activity; WorkSpaces/Connect notes.	Operate / audit

2026 lifecycle watchlist

Notebook service	Current speaking rule	Interview move
Application Migration Service	Now AWS Transform MGN.	Use the new name and explain rehosting.
Server Migration Service	Full shutdown.	Do not propose for new designs.
OpsWorks Stacks	End-of-life/disabled.	Use modern operations/IaC alternatives.
Cloud9	Unavailable to new customers.	Describe concept only if legacy context.
Data Pipeline	Maintenance mode; unavailable to new customers.	Choose Glue/Step Functions/MWAA or another current workflow by requirement.
CodeCommit	Current docs say available to new customers again since Nov 2025.	Verify lifecycle status rather than relying on old notes.

8. Current official references used for the refresh

AWS Certified Cloud Practitioner CLF-C02 - Domain 3 Cloud Technology and Services (34%).

CLF-C02 in-scope services list, including EventBridge, Systems Manager, Control Tower, Backup and current migration services.

AWS EventBridge evolution from CloudWatch Events.

AWS migration-service and Data Pipeline availability updates.
