

MAHMOUD SALAMA

CHIEF TECHNOLOGY OFFICER / IT DIRECTOR

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Chief Technology Officer / IT Director opportunities where technology strategy, enterprise architecture, service operations, governance and digital transformation are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

I currently lead a 54-person technology organization with 7 direct reports, including an approximately 20-person customer-service and technical-support operation. My scope spans enterprise platforms, architecture, delivery governance, data and integration, service reliability, security governance and business continuity.

Earlier, I led development teams in Oman and Egypt while remaining hands-on across C#/.NET, databases, APIs, government workflows, testing, deployment and production support. This combination lets me connect executive priorities with the engineering and operating detail required to deliver reliable technology at scale.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
