

MAHMOUD SALAMA

DIGITAL TRANSFORMATION DIRECTOR

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Digital Transformation Director opportunities where digital strategy, process redesign, enterprise platforms, change and adoption are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

At UPA, I lead technology and digital-transformation work across national-scale enterprise platforms, translating operating priorities into roadmaps, architecture, process redesign, delivery governance, data/integration and adoption. The environment supports approximately 60,000 users, 90,000 facilities/entities, 300 suppliers and around one million transactions per month.

My earlier government-delivery experience in Oman and Egypt adds a strong implementation foundation: requirements, workflow design, application and database delivery, testing, deployment, training and support. I therefore approach transformation as an operating change program, not simply a technology implementation.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
