

MAHMOUD SALAMA

ENTERPRISE ARCHITECT

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Enterprise Architect opportunities where enterprise architecture, target-state design, integration, data and governance are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

My current scope includes enterprise and solution architecture for national-scale platforms, with responsibility for architecture governance, integration, data, non-functional requirements, delivery alignment and operational supportability. I work across configurable platforms, workflow/RBAC, APIs, enterprise data and service operations.

I also bring substantial hands-on engineering history from government platforms in Oman and Egypt, including C#/.NET, databases, APIs, reporting, workflow systems, testing and deployment. That background helps me produce architecture that is both strategically coherent and implementable.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
