

MAHMOUD SALAMA

IT / INFORMATION SYSTEMS MANAGER

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in IT / Information Systems Manager opportunities where IT operations, information systems, service management, support and governance are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

I lead enterprise technology and information-systems operations within a 54-person organization, including an approximately 20-person service desk, technical-support and customer-service operation. My responsibilities cover enterprise applications, service governance, incident/escalation management, continuity, infrastructure/security oversight, data/integration and user adoption.

My background also includes hands-on application and database delivery and leadership of development teams in Oman and Egypt. This gives me a practical ability to coordinate users, support teams, engineers, vendors and stakeholders around reliable day-to-day services and sustainable modernization.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
