

MAHMOUD SALAMA

IT PROGRAM / TECHNOLOGY DELIVERY MANAGER

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in IT Program / Technology Delivery Manager opportunities where technology programs, delivery governance, dependencies, releases and stakeholder alignment are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

I currently oversee technology initiatives across enterprise platforms, architecture, integration, data, service operations and modernization. My work includes roadmaps, delivery planning, cross-team dependencies, risks/issues, stakeholder alignment, QA/UAT, release readiness, service transition and executive reporting.

Because my career began in hands-on software delivery and progressed through development-team leadership, I can manage programs with a strong understanding of technical dependencies, implementation constraints and production realities. I have delivered government and enterprise platforms across Egypt and Oman.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
