

MAHMOUD SALAMA

LEAD BUSINESS SYSTEMS ANALYST

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Lead Business Systems Analyst opportunities where business systems analysis, requirements, process redesign and digital transformation are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

My experience combines senior technology leadership with deep business-to-technology analysis. I have led stakeholder discovery, requirements definition, As-Is/To-Be analysis, process redesign, functional requirements, acceptance criteria, data/integration requirements, UAT and adoption across national and government platforms.

This is reinforced by hands-on delivery experience in Oman and Egypt, particularly large workflow and correspondence systems where analysis, databases, reporting, testing, deployment and support were tightly connected. I can therefore bridge business needs, architecture and implementation without losing operational context.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
