

MAHMOUD SALAMA

PRODUCT DELIVERY MANAGER - ENTERPRISE PLATFORMS

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Product Delivery Manager - Enterprise Platforms opportunities where enterprise product delivery, roadmaps, prioritization, adoption and product operations are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

I lead delivery and continuous improvement of enterprise platforms operating at national scale. My work connects stakeholder discovery, roadmap and backlog priorities, requirements and acceptance criteria, architecture, QA/UAT, release/go-live, support feedback, adoption and operational service quality.

A key strength is the closed loop between product delivery and service operations: the approximately 20-person customer-service and technical-support function provides direct insight into user needs, incidents and adoption challenges. Earlier hands-on engineering and government-platform delivery gives me the technical depth to work effectively with architecture and engineering teams.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
