

MAHMOUD SALAMA

SOFTWARE DEVELOPMENT & DELIVERY MANAGER

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Software Development & Delivery Manager opportunities where software engineering leadership, SDLC, architecture, releases and production delivery are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

My career combines hands-on software engineering with progressively larger delivery leadership. I have led development teams of 6 and 10+ people and delivered more than 150 major and mid-sized engagements during my Keyframe period, followed by 15+ government and enterprise platforms in Oman and national-scale technology leadership in Egypt.

My technical experience spans C#/.NET, JavaScript, React, Node.js, REST/GraphQL APIs, SQL Server, PostgreSQL, MySQL, Redis, Docker, CI/CD and enterprise integration, alongside architecture/design review, QA/UAT, release governance, production support and incident/RCA practices.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
