

MAHMOUD SALAMA

SOLUTION ARCHITECT - ENTERPRISE APPLICATIONS & INTEGRATION

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Solution Architect - Enterprise Applications & Integration opportunities where solution architecture, enterprise applications, APIs, workflow and integration are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

I design and govern enterprise solutions across applications, APIs, workflow, RBAC, data, integration and non-functional requirements, while remaining closely connected to delivery, QA/UAT, release readiness and service transition. My current environment includes national-scale enterprise platforms and complex stakeholder ecosystems.

My hands-on background includes C#/.NET, JavaScript, React, Node.js, REST/SOAP/GraphQL, SQL Server, PostgreSQL, MySQL, Redis, Docker and enterprise CMS/workflow technologies. Earlier Oman work on Maktabi/Morasalat and other government platforms provides substantial experience with workflow-heavy, database-driven systems.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
