

MAHMOUD SALAMA

TECHNOLOGY EXECUTIVE - DIGITAL TRANSFORMATION & ENTERPRISE SYSTEMS

Cairo, Egypt | +20 122 015 6077 | ma7moud.salamaaa@gmail.com

Dear Hiring Manager,

I am writing to express interest in Technology Executive - Digital Transformation & Enterprise Systems opportunities where technology leadership, enterprise systems, transformation, architecture and operations are central to the role. I bring 18+ years of technology experience spanning hands-on engineering, development leadership, government platforms, enterprise systems and executive technology management across Egypt and Oman.

I currently lead a 54-person technology organization with 7 direct reports and an approximately 20-person support/customer-service operation. My scope spans technology strategy, digital transformation, enterprise architecture, platform delivery, data/integration, service operations, security governance, continuity and controlled AI adoption.

My career developed from hands-on engineering through development-team leadership in Egypt and Oman to executive ownership of national-scale technology. That progression allows me to connect strategy to architecture, architecture to delivery, and delivery to reliable operations and user adoption.

I would welcome the opportunity to discuss how this combination of executive accountability, technical depth and operational delivery can support your organization's technology objectives. Thank you for your consideration.

Sincerely,

Mahmoud Salama
