PROFESSIONAL PROFILE

Senior business-systems and technology professional with 18+ years bridging business needs, operational processes, enterprise applications, data, integration and technology delivery across Egypt and Oman. Combines requirements analysis, stakeholder engagement, current-state/process analysis, business-to-technology translation, data mapping and validation, functional testing/UAT, deployment and production support with deep technical delivery experience. Currently leads information-systems and digital-transformation work within a 54-person technology organization supporting a national procurement ecosystem serving ~60K users, ~90K facilities/entities and ~1M transactions/month.

CORE BUSINESS ANALYSIS & TRANSFORMATION AREAS

Requirements Elicitation & Analysis | Business Systems Analysis | Stakeholder Workshops & Management | Current-State / Target-State Analysis | Process Mapping & Improvement | Gap Analysis | Business & Functional Requirements | Use Cases / User Stories | Acceptance Criteria | Business Rules & Controls | Requirements Traceability | Data & Integration Requirements | UAT & Stakeholder Acceptance | Change & Adoption

SELECTED CAREER IMPACT

- Lead business-systems and requirements analysis with stakeholder alignment for national-scale enterprise platforms serving ~60K users and ~90K facilities/entities.
- Translate complex procurement and medical-supply requirements and workflows into governed digital processes supporting ~1M transactions/month, strengthening control, traceability and operational visibility.
- Bridged business requirements, process analysis and technical delivery across 15+ enterprise/e-government platforms in Oman, including a ~1M-user National Educational Portal.
- Led a 6-person development team and contributed hands-on across 150+ major and mid-sized Keyframe projects, excluding small engagements, frequently bridging client needs, analysis and delivery.

PROFESSIONAL EXPERIENCE

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt 05/2025 - Present Head of the Central Administration for Information Systems & Digital Transformation

Scope: Requirements & Business Systems Analysis | Process Improvement | Stakeholder Management | Data & Integration | UAT/Validation | Digital Transformation

- Lead requirements and business-systems analysis across a unified national procurement ecosystem covering demand, approvals, tendering, supplier evaluation, contracts, purchase orders, delivery/receipt, reporting, support and auditability.
- Engage business owners and operational stakeholders through structured discussions/workshops to analyze objectives, pain points, current-state processes, target workflows, business rules, roles/permissions, exceptions, data needs and operational controls.
- Translate business and operational needs into process flows, business and functional requirements, business rules, data mappings, integration/API requirements, reporting/KPI requirements and prioritized delivery scope for technical teams.
- Coordinate requirement clarification and change across business stakeholders, analysts, architects, engineering, QA, data and support teams through design, UAT/functional testing, defect triage, release readiness, rollout, feedback and continuous improvement.
- Use SQL/data analysis, reporting and production evidence for requirement validation, gap/root-cause investigation, data reconciliation, expected-vs.-actual behavior analysis and evidence-based decisions.

Egyptian Authority for Unified Procurement (UPA) | Cairo, Egypt 10/2020 - 05/2025 General Manager - Systems, Applications & Technical Support

- Directed requirements, business/process and application analysis across procurement, medical supply, inventory, reporting, CMS/publishing, workflow and stakeholder-service capabilities.
- Performed current-state / target-state process analysis and converted manual, paper-, spreadsheet- and email-driven work into configurable digital workflows with clearer rules, approvals, traceability, data controls, reporting and auditability.
- Managed multi-agency stakeholder alignment across data, compliance, rollout, training and operational readiness for national initiatives and shared services.
- Led UAT/testing readiness, stakeholder acceptance, training, support feedback, issue escalation and adoption loops to validate system behavior, prioritize enhancements and improve service outcomes.

Integral Solutions LLC | Muscat, Oman

05/2016 - 10/2020

Development Team Leader & Senior Full-Stack Developer

- Worked directly with government stakeholders to elicit and analyze business requirements and processes and translate them into enterprise-system capabilities across Oman Ministry of Education and other public-sector environments.
- Contributed extensively to Maktabi/Morasalat Electronic Correspondence across correspondence workflows, routing/forwarding/tracking, reporting, database components, functional testing, defect investigation, deployment and application support.

- Applied the same business-to-technology bridge across the ~1M-user National Educational Portal, the Sultan Qaboos Award-winning Ministry of Education Recruitment System, International Schools, Crisis Management, Asset Management and Ministry of Agriculture solutions.

Keyframe Egypt | Cairo, Egypt

04/2011 - 05/2016

Development Team Leader & Senior Full-Stack Developer

- Led a 6-person development team while remaining deeply hands-on across 150+ major and mid-sized projects/engagements, excluding small projects, across government, healthcare, education, construction/real estate, automotive, events and commercial sectors.
- Translated client and user requirements into portals, CMS, workflow, reporting, access-control and integration solutions, frequently owning analysis, clarification, implementation, testing, deployment and support end-to-end.
- Delivered multiple award-winning digital solutions; Yashfeen is the confirmed ITIDA competition-winning healthcare portal.

Egyptian Armed Forces | Egypt

04/2008 - 10/2010

Linux Systems & Web Developer

- Contributed to Egypt's first Linux distribution, working on Linux from Scratch builds, kernel modules, optimization, and platform hardening; also built secure internal ASP.NET/SQL Server applications.

TECHNICAL & MANAGEMENT CAPABILITIES

Business Analysis: Requirements Elicitation & Analysis, Business Systems Analysis, Stakeholder Workshops, As-Is/To-Be, Process Mapping, Gap Analysis, Functional Requirements, Use Cases/User Stories, Acceptance Criteria, Business Rules, Traceability, Business-to-Technology Translation

Process, Data & Integration: Business Process Improvement, Workflow Analysis, Data Mapping, Master/Reference Data, Data Quality, Reporting/KPIs, API/Integration Requirements, SQL Analysis, Validation & Reconciliation, Root Cause Analysis

Delivery & Validation: SDLC Support, Prioritization, UAT/Functional Testing, Defect Triage, Release Readiness, Training/Adoption, Support Feedback, Production Validation, Continuous Improvement

Technical Fluency: SQL Server, PostgreSQL, MySQL, Excel/Power Query, Power BI, REST/SOAP APIs, JSON, Microsoft Dynamics 365 integrations, Postman/Swagger, C#/I.NET background, Enterprise Reporting, Applied AI & Automation for analysis/documentation

EDUCATION & LANGUAGES

Education: B.Sc. in Computer Science, Faculty of Computers & Informatics, Zagazig University | 2003-2007

Languages: Arabic (Native) | English (Professional Working Proficiency)
